INDEX FOR 1980

A

Alabama space and rocket center: launch plus 10, May, 1980, 4.
America's other space program, April, 1980, 4.
Ariane, February, 1980, 13.

B

Biology in space, June-July, 1980, 16.

E

Energy technology applications program, NASA, August-September, 1980, 16.

F

Food for zero G, November, 1980, 20.
Free enterprise in space, Three, two, one, blastoff!, December, 1980, 12.

G

Galileo delay, Impact of, April, 1980, 15.
Geopak to search for oil and gas from space, August-September, 1980, 4.
Giant orbiting telescopes considered for the 1990s, November, 1980, 7.

H

Hardhats in space, May, 1980, 6.
Highlights of 1979 activities: Year of the planets, February, 1980, 4.

I

It's a big old "10-4" out in Earth orbit, June-July, 1980, 12.

K

KSC begins spacelab work, October, 1980, 12.

L

Laser systems to study Earth's crustal movements, NASA, April, 1980, 28.
Lunar goal required huge booster, January, 1980, 26.

M

Mirror for world's most powerful satellite, March, 1980, 28.

N

Narrowcasting: space stations for the 80's, October, 1980, 10.
NASA's life science work: big questions and small, August-September, 1980, 8.

O

Orbiting observatories scan the unseen universe, June-July, 1980, 4.
Otrag, November, 1980, 4.
Outer space, Interior design for, March, 1980, 24.

P

Pioneer Saturn encounter, January, 1980, 4.
Pointing system to fly on NASA rocket, April, 1980, 18.
Private astronaut, The first, November, 1980, 9.

R

Research into the level of positive attitude in the space sciences of 7th and 12th grade science students, A descriptive, January, 1980, 28.

S

Salyut
- Highlights of the mission, August-September, 1980, 10.
- 6 equal more Russian records, October, 1980, 14.

Satellite economics victim of OMB cuts, April, 1980, 13.
Satellites
- A gathering of, December, 1980, 22.
- World food resources, and, October, 1980, 19.

Shuttle engine qualifying tests nearly complete, June-July, 1980, 20.
Shuttle setbacks challenge engineers' ingenuity, May, 1980, 14.
Skylab plaques to Australia, March, 1980, 23.
Solar array advance may aid space future, January, 1980, 24.
Solar power satellite bill, House approves new, March, 1980, 4.
Solar power satellite, The case for the, March, 1980, 5.
Solar power system, Facts and figures for the space, March, 1980, 21.
Solar system: Blueprints for tomorrow, The, December, 1980, 4.
Soviet space shuttle, Is there a, August-September, 1980, 21.
Soviets as top investors in space, U.S. analyst sees, November, 1980, 13.
Space astronomy: taking man's eyes to new worlds, December, 1980, 8.
Space colonization, Libration points and, August-September, 1980, 13.
Space for sale, April, 1980, 20.
Space shuttle, Army rations to be used aboard space shuttle, August-September, 1980, 6.
Space shuttle payload programs for students, June-July, 1980, 22.
Space station, Johnson space center is reviving plans for, February, 1980, 27.
Space: the Air Force's future initiative, February, 1980, 29.
Spacelab experiments include man and plants, June-July, 1980, 9.

V

Venus features identified, Major, December 1980, 17.
Viking orbiter I art gallery, A, December, 1980, 10.
Voyager 1-Saturn encounter summary, October, 1980, 7.
Voyagers Saturn-bound, April, 1980, 26.

W

Weather forecasts with new satellites, Better, October, 1980, 4.

INDEX FOR 1980

A

Alabama space and rocket center: launch plus 10, May, 1980, 4.
America's other space program, April, 1980, 4.
Ariane, February, 1980, 13.

B

Biology in space, June-July, 1980, 16.

E

Energy technology applications program, NASA, August-September, 1980, 16.

F

Food for zero G, November, 1980, 20.
Free enterprise in space, Three, two, one, blastoff!, December, 1980, 12.

G

Galileo delay, Impact of, April, 1980, 15.
Geopak to search for oil and gas from space, August-September, 1980, 4.
Giant orbiting telescopes considered for the 1990s, November, 1980, 7.

H

Hardhats in space, May, 1980, 6.
Highlights of 1979 activities: Year of the planets, February, 1980, 4.

I

It's a big old "10-4" out in Earth orbit, June-July, 1980, 12.

K

KSC begins spacelab work, October, 1980, 12.

L

Laser systems to study Earth's crustal movements, NASA, April, 1980, 28.
Lunar goal required huge booster, January, 1980, 26.

M

Mirror for world's most powerful satellite, March, 1980, 28.

N

Narrowcasting: space stations for the 80's, October, 1980, 10.
NASA's life science work: big questions and small, August-September, 1980, 8.

O

Orbiting observatories scan the unseen universe, June-July, 1980, 4.
Otrag, November, 1980, 4.
Outer space, Interior design for, March, 1980, 24.

P

Pioneer Saturn encounter, January, 1980, 4.
Pointing system to fly on NASA rocket, April, 1980, 18.
Private astronaut, The first, November, 1980, 9.

R

Research into the level of positive attitude in the space sciences of 7th and 12th grade science students, A descriptive, January, 1980, 28.

S

Salyut
- Highlights of the mission, August-September, 1980, 10.
- 6 equal more Russian records, October, 1980, 14.

Satellite economics victim of OMB cuts, April, 1980, 13.
Satellites
- A gathering of, December, 1980, 22.
- World food resources, and, October, 1980, 19.

Shuttle engine qualifying tests nearly complete, June-July, 1980, 20.
Shuttle setbacks challenge engineers' ingenuity, May, 1980, 14.
Skylab plaques to Australia, March, 1980, 23.
Solar array advance may aid space future, January, 1980, 24.
Solar power satellite bill, House approves new, March, 1980, 4.
Solar power satellite, The case for the, March, 1980, 5.
Solar power system, Facts and figures for the space, March, 1980, 21.
Solar system: Blueprints for tomorrow, The, December, 1980, 4.
Soviet space shuttle, Is there a, August-September, 1980, 21.
Soviets as top investors in space, U.S. analyst sees, November, 1980, 13.
Space astronomy: taking man's eyes to new worlds, December, 1980, 8.
Space colonization, Libration points and, August-September, 1980, 13.
Space for sale, April, 1980, 20.
Space shuttle, Army rations to be used aboard space shuttle, August-September, 1980, 6.
Space shuttle payload programs for students, June-July, 1980, 22.
Space station, Johnson space center is reviving plans for, February, 1980, 27.
Space: the Air Force's future initiative, February, 1980, 29.
Spacelab experiments include man and plants, June-July, 1980, 9.

V

Venus features identified, Major, December 1980, 17.
Viking orbiter I art gallery, A, December, 1980, 10.
Voyager 1-Saturn encounter summary, October, 1980, 7.
Voyagers Saturn-bound, April, 1980, 26.

W

Weather forecasts with new satellites, Better, October, 1980, 4.

YOU ASKED FOR IT. SO HERE AT LAST IS THE SPACE WORLD Back Issue Sale

Here is a remarkable storehouse of space information—all listed by title in each year to make it easy to pursue your own area of interest, or purchase the complete set of available issues—a treasury of space news from the year 1963 to the present. SPACE WORLD was the first space age magazine to cover the space story for everyone. These are collector's items. Please hurry before the limited supply is depleted. Don't be disappointed—send in your order TODAY. Order blank and price list on page 40.

Space World Titles

1963—1964—1965—1966

A

Apollo
- 202, December 1966, 30
- A communications system for, August 1964, 9
- Communications, August 1964, 6
- Launch escape system, March 1965, 14
- Mission concept, August 1964, 12
- Pad abort, October 1965, 16
- Project, August 1964, 4
- Spacecraft 009, March 1966, 4
- Suit, July 1965, 22

Armour, Space, July 1964, 14

Award, Space World's 1964, January 1965, 11

B

Bacteria, November-December 1963, 36

Ballute, Pilot, June 1965, 17

Big Dish, September 1965, 22

Big Spin, September-October 1963, 34

Bioastronautics, April 1964, 33

Boeing, Salute to, Space contributor, December 1966, 24

C

Crew systems development, February 1964, 17

Cryogenics, November-December 1963, 16

D

Democracy and space, September 1964, 31

E

Electricity from muscles, February 1964, 41

EMPIRE, Early Manned Planetary-Interplanetary Roundtrip Expedition, March 1965, 22

Exploration and education, Space, September 1964, 14

F

Fire Protection, Space age, July 1965, 12

Flight Testing, Future requirements for LH_2 vehicle, May 1965, 15

Food development for space flight, Factors affecting, September 1964, 37

G

Gemini
- 3, June 1965, 4
- 8, May 1966, 4
- 11, Record breaker, December 1966, 14
- And Apollo crews, June 1966, 12
- Chronology, February 1964, 31
- Countdown, June 1965, 19
- Experiments, July 1964, 12
- Flight, July 1965, 23
- Launching sequence, June 1964, 22
- Mercury experience applied, February 1964, 10
- Spacesuit, January 1965, 36
- Summary flight plan, June 1965, 22

Goals, A biophysicist evaluates space, May 1965, 8

Guidance, Star tracking, October 1965, 10

I

Insurance for the space age, September 1964, 34

K

Knowledge, The pursuit of space, May 1964, 19

L

Laboratory, The automated biological, July 1965, 16

Launch Vehicles
- Agena engine, March 1966, 34
- Atlas-Centaur AC-2, April 1964, 23
- Atlas-Centaur AC-6, October 1965, 4
- Atlas space launch vehicle facts, Project fire, July 1964, 4
- Centaur AC-8, May 1966, 11
- Centaur, Inertial guidance for, March 1965, 12
- Do-it-yourself space, November-

(continued on next page)

December 1963, 10
Little Joe II propulsion, Changes in, March 1964, 10
Million pounds in orbit, November-December 1963, 15
Moon bird, Ground testing a, September 1965, 13
Saturn, S-IVB, June 1966, 16
Saturn SA-5, Fifth, April 1964, 11
Saturn, Sixth, August 1964, 16
Titan II, February 1964, 16
Titan II, Squadron-operational, September-October 1963, 32
Titan 3, June 1965, 5
Lunar base concept, July 1964, 11
Lunar Excursion, February 1964, 4
Lunar Vehicle, June 1965, 30
Lunar vehicle study, May 1966, 24

M

Magnetohydrodynamics, November-December 1963, 12
Man survive in space, Can, November-December 1963, 4
Maneuvering and control, Space, March 1965, 20
Mars, June 1964, 32
Mars Mission, June 1966, 10
Mars target areas, May 1965, 22
MEM study, January 1965, 20
Mercury Monument, January 1965, 32
Mercury soft landing, October 1965, 36
Meteorite, If you find a, March 1964, 22
Meteoroid, Making like a, April 1964, 40
MFC, May 1966, 30
Missile Mail, How I tracked down the first official U.S., May 1964, 34
Missile Mail, The first official United States, April 1964, 20
Moon, A day on the, March 1966, 4
Moon, Beyond the, September-October 1963, 21
Moon flight rehearsal, September-October 1963, 31
Moon, See the mystery of the, at New York world's fair, June 1964, 36
Moon, Simulated trip to the, May 1965, 30
Moonmobile, Designing a, January 1965, 38

N

Noise during space missions, March 1965, 11
North American Aviation Inc., Giant space contributor, June 1966, 20
Nuclear engine for rocket vehicle application, NERVA, March 1966, 18
Nuclear Propulsion, November-December 1963, 40
Nuclear propulsion in the space age, March 1966, 20
Nuclear rocket spacecraft, September-October 1963, 22

O

Outer space stampede, July 1964, 15

P

Parachutes could recover big boosters, June 1965, 29
Photography, Experimental, February 1964, 39
Photography in space, February 1964, 34
Pilots chosen, Two X-15, September-October 1963, 35
Power from waste, February 1964, 33
Program, United States space, February 1964, 23

R

Radiobiological aspects of early manned space flight, Some, September-October 1963, 45
Recovery, The science of, March 1964, 32
Research, The engineer in U.S. space, September 1964, 10
Rocket, The man, September-October 1963, 36
Rocket case, Monolithic 156-inch diameter, made from parts of two motors, May 1966, 21
Rocket Steering, June 1966, 18
Rocketry, Supervised amateur, March 1964, 16
Rockets, Segmented, August 1964, 22

S

Satellites, May 1964, 22
A B L, June 1966, 14
Beacon Explorer, January 1965, 17
Beacon Explorer-C, July 1965, 4
Early Bird, June 1965, 26
Echo, May 1964, 13
Echo II, April 1964, 4
Echo, Fifth birthday for, October 1965, 40
Explorer, May 1964, 14
Explorers S-55C, More (explorers 24-25), April 1965, 7
Global defense communications, June 1966, 4
Hitchhiking orbital pods, February 1964, 42
Home-made satellites for "ham" operators, June 1965, 36
IMP-2, January 1965, 40
Ionosphere beacon satellite, June 1964, 10
Lincoln calibration sphere, December 1965, 14
Mariner, May 1964, 8
Mariner C and D, January 1965, 4
Mariner IV, September 1965, 4, October 1965, 21
Mariner IV flies on, April 1965, 21
Mariner IV interim science findings, July 1965, 7
Navigation, October 1965, 38
Nuclear Detection, September 1965, 36
OAO, September 1964, 4
OAO-A1, May 1966, 15
OAO-OGO: EGO and POGO, May 1964, 7
Orbital vehicle one—OV1-4 and OV1-5, June 1966, 7
Orbiting Eye, May 1965, 34
OSO, May 1964, 6
PAGEOS, March 1965, 4
Pegasus C, September 1965, 16
Pioneer VI, March 1966, 26
Pioneer VI probe passes earth in near solar orbit, May 1966, 32
Pioneer VII, December 1966, 36
Radiation Detection (Explorer 26), April 1965, 13
Ranger, May, 1964, 12
Ranger 6, April 1964, 8
Relay, May 1964, 4
Relay I refuses to stop operating, March 1964, 40
Research, October 1965, 15
San Marco, April 1965, 4
Surveyor 2, December 1966, 4
Surveyor 2 preparation, December 1966, 12
Surveyor "meets" booster, May 1966, 26
Syncom, May 1964, 15
Tiros, May 1964; 10
Tiros VII—new records, September-October 1963, 10
Tiros X, September 1965, 19
UK-2, June 1964, 19
Satellite Navigation, May 1964, 16
Satellites in orbit, May 1964, 31
Science and education, Space, September 1964, 18
Scientist-Astronauts, October 1965, 23
Scientist, The creative, March 1964, 6
SNAP, Little giant of the space age, June 1964, 14
Solar tracking facility, March 1965, 17
Solar wind, Dynamics of the, August 1964, 35
Space advances in the next fifty years, June 1964, 4, July 1964, 31, August 1964, 40, September 1964, 23
Space, Can man survive in, November-December 1963, 4
Space man to glue self to his vehicle, May 1966, 34
Space, NASA's year in, March 1964, 31
Space station trends, September 1965, 24
Space stations, Manned, March 1964, 13
Spacecraft, Janus, April 1965, 34
Spacecraft, 6-man Mars, September, 1965, 32
Spaceport, Gateway to outer space, NASA's, October 1965, 31
Spaceships, Who really designed today's, April 1965, 23
Spur, November-December 1963, 31
Stars, Simulated, March 1965, 8
Subroc, The flying torpedo, July 1964, 20
Suits, Space, September-October 1963, 16, November-December 1963, 32
Supersonic jet flight, June 1964, 20

T

Telescope, World's largest radar, May 1965, 12
Traffic cop in space, April 1964, 31
TV clutterless color, Space-to-home, June 1965, 34
TV first in space, A, June 1965, 23
TV in space, April 1965, 17

V

Venus, Unmasking mysterious, July 1964, 8
Venus mission, Experiments for, June 1966, 36
Visual research in space flight, May 1965, 4
Von Karman, Space industry mourns, September-October 1963, 19

W

Weather report, Instant, May 1966, 28
Weightlessness Simulator, May 1965, 28
Women of space, September-October 1963, 6
Women, Talented, May 1964, 35
World where nothing falls without a push, The, May 1965, 24
World's fair, The world of space at the, August 1964, 19

X

X-15, More tasks for "new", May 1964, 38
X-20 Flight, November-December 1963, 23

1967

A

Apollo
Communication antennas for Lunar Module, July 1967, 12
Telescope mount, September 1967, 7
Tragedy, December 1967, 24
Astronaut Fatigue, Next steps to reducing, September 1967, 32
Astronauts, The nineteen, February 1967, 16
Astronaut's job of the future, July 1967, 31
Automated biological laboratory, The, September 1967, 10
Aviation salon in Le Bourget, Paris, The, October 1967, 28

B

Bio Control, March 1967, 13
Braving the dragon's breath, June 1967, 4

C

Control tower for missile age, June 1967, 22
Cosmonaut and artist, December 1967, 32

E

Exobiology: Its methods and problems, October 1967, 37

F

French space program, The, August 1967, 16

G

Gemini
11, Sights and sounds of—captured and recorded on film, January 1967, 17
12, January 1967, 19
Last Gemini brings Lunar surface a step closer, February 1967, 10
Good Year develops new type parachute, August 1967, 40

H

Hybrid rocket, Flying, March 1967, 18

K

Knowledge, No boundaries to, December 1967, 26
Komarov, Vladimir—He was loved by all, August 1967, 36

L

Laser—Future space tool, August 1967, 38
Launch Vehicles
Atlas-Centaur 9, January 1967, 13
Titan III-C, February 1967, 4
Lockheed, Salute to, May 1967, 25
Luna 12, Photographed the moon, How, July 1967, 14
Lunar landing research vehicle, May 1967, 11
Lunar landing training vehicle, Trainer for moonbound astronauts, March 1967, 15
Lunar leaper, May 1967, 24
Lunar rocket engine, Vital step in buiding, July 1967, 11
Lunar scientific survey module, July 1967, 34
Lunar sky taxi, December 1967, 28

M

Magnetoaerodynamic Re-entry—A unique method of re-entry for future spacecraft, April 1967, 34
Mars, Life on, February 1967, 14
Memorium, Virgil I. Grissom, Edward H. White, and Roger B. Chaffee, In, May 1967, 19
Moon, Long shadows on the, June 1967, 34
Moon mission, July 1967, 23
Moon station, Scientific, April 1967, 12

O

Orbital Workshop, NASA, July 1967, 16

P

Power conversion system for extended space flight, October 1967, 30

R

Reactor study, March 1967, 42
Redoubtable—France's first nuclear-powered submarine, The, September 1967, 14
Rocket-Sonde, July 1967, 19

S

Satellites
American—Exhibited at Expo 67, November 1967, 28
Applications Technology Satellite (ATS), March 1967, 4 and July 1967, 4
Biosatellite, March 1967, 8
Biosatellite B studies biology of space flight, December 1967, 4
Comsat, January 1967, 4
ESSA IV, April 1967, 7
Gemini, Surveyor, Lunar Orbiters top 1966 space news, May 1967, 34
Intelsat II, April 1967, 4
Lunar Orbiter, January 1967, 16
Lunar Orbiter photo mission, Results of, September 1967, 16
Lunar Orbiter photo transmission comes to end, August 1967, 41
Mariner V launch successful, October 1967, 4
Military communications satellite, April 1967, 16
Nimbus II, The "Miracle" satellite, May 1967, 15
OGO-IV Observatory in orbit, November 1967, 30
Orbiter (Third) moon photo launch, May 1967, 4
Orbiting Antenna for deep space probe communications, June 1967, 21
OSO, June 1967, 16
Pegasus satellites get another year's work, March 1967, 40
Pioneer VI and VII find limits of shell protecting Earth, September 1967, 4
Russian—Exhibited at Expo 67, November 1967, 26
San Marco-B, October 1967, 17
Surveyor 3 on the Moon, August 1967, 4
Surveyor IV goes dead, November 1967, 4
Surveyor V now on Moon, December, 1967, 15
UK satellite launched, October 1967, 32
Vela—Nuclear detection satellites, August 1967, 12
Satellite communications by traveling-wave maser, January 1967, 32
Satellites in your future, November 1967, 22
Scientist-Astronauts join NASA team, November 1967, 14
Sea of Rains seen from an altitude of 100 Kilometers, February 1967, 12
Space and time, December 1967, 30
Space boosters, Add-On, March 1967, 16
Space launchings, February 1967, 26
Space: Pacemaker for Technology, March 1967, 37
Space station, Instant, March 1967, 20
Space vehicle communications, February 1967, 8
Space watcher, May 1967, 18
Staff, The program, April 1967, 20

T

Testing Saturn stage separations without going into space, May 1967, 16
TRW systems, From calendar, January 1967, 23
TRW systems, Salute to, March 1967, 22

U

Universe, A closer look at the, October 1967, 23

V

Venus, New facts about, November 1967, 20
Voyager program, The, June 1967, 8

W

Weightless man, The, April 1967, 26

1968

A

Adaptation in a small chamber, July 1968, 25
Agena rocket engine—six generations of reliability in space propulsion, The, April 1968, 12
Apollo

- Six Americans, four Europeans compete for jobs on, as payload-specialist astronauts, July 1978, 14
- 2 payload specialist astronaut candidates named, July 1978, 13

STS-Spacelab utilization relative to past and future manned space flight, January 1978, 21

V

Venus spacecraft launched, Five-in-one, October 1978, 26

Venus, The planet, November 1978, 6

W

We're going, February 1978, 15

Women scientists meet in DC, March 1978, 25

1979

A

Another decade may elapse before man returns to moon, November 1979, 24

B

Beyond earth, October 1979, 16

E

Earth's invisible shield, may play role in weather, March 1979, 24

Earth's ozone in peril? '81 mission seeks answer, Is, November, 1979, 29

(continued on next page)

December 1979, 23
Energy for the 1980s, June-July, 1979, 31
Experimental solar array wing, December 1979, 8

G

Goddard space flight center: NASA's jack-of-all-trades, May 1979, 14

M

Manned orbital facility: a user's guide, February 1979, 22
Martians may make their homes in rocks, May 1979, 18

N

Nerve center for a space mission, March 1979, 29

P

Pioneer-Venus close encounters with the cloudy planet, May 1979, 19

R

Ride a comet's tail on wings of the sun, December, 1979, 4

S

Salyut
An international spaceport, April 1979, 15.
Medical results of the 140-day Salyut-6 expedition, April 1979. 4
Salute to, April 1979, 4
6: space biology and medicine, April 1979, 30
The military, April 1979, 18
Satellites
A longer lifeline for, May 1979, 22
Global weather—two decades of accomplishment, November 1979, 10
HEAO designed to probe anti-matter at galaxy's center, Last, December 1979, 12
Save nation $172 million annually, May 1979, 12
Skylab story, The, June-July 1979, 10
Space
Beam builder demonstrated, February 1979, 33
Civilization in space: the chronicles plan, February 1979, 5
First experiment planned for power in, February 1979, 32
Mining outer, March 1979, 14
Space-based radar, May 1979, 4
Space colonization, The social aspects of space colonization, December 1979, 25
Space colony
What should a space colony cost to build?, October 1979, 25
Space factory, The promise of the, October 1979, 4
Space shuttle
Sophisticated insulation barrier to protect crew of, June-July 1979, 18
Space stations
Symbols and tools of new growth in an open world, February, 1979, 8
Space telescope, November, 1979, 4
Star probe study effort concluded, June-July, 1979, 25
Sun
Study of sun toward a new era, March 1979, 4

V

Viking reveals Martian plain spread with frost, December 1979, 14
Voyager 2 looks closely at Jupiter, December 1979, 15
Voyager views the Jovian system, June-July 1979, 21

W

Women commplete space tests, March 1979, 26

X

X-ray observatory reveals extremely distant quasars, June-July 1979, 4
